Contents of Volume 230, 1983

No. 1 issued on March 16, 1983

Y. Nakai, S. Shioda, H. Ochiai, J. Kudo, A. Hashimoto: Ultrastructural relationship between monoamine- and TRH-containing axons in the rat median eminence as revealed by combined autoradiography and immunocytochemistry in the same tissue section 1

H. Nornes, A. Björklund, U. Stenevi: Reinnervation of the denervated adult spinal cord of rats by intraspinal transplants of embryonic brainstem neurons 15

M. Yoshino, Y. Kondoh, M. Hisada: Projection of statocyst sensory neurons associated with crescent hairs in the crayfish *Procambarus clarkii* Girard 37

G.M. Ulrich, H. Rembold: Caste-specific maturation of the endocrine system in the female honey bee larva 49

K. Miyata, K. Takaya: Vacuoles in macrophages and reticular cells of regional lymph nodes of the rat after injection of large doses of steroids 57

H. Schooneveld, G.I. Tesser, J.A. Veenstra, H.M. Romberg-Privee: Adipokinetic hormone and AKH-like peptide demonstrated in the corpora cardiaca and nervous system of *Locusta migratoria* by immunocytochemistry 67

M.J. Cavey: Ultrastructure and differentiation of ascidian muscle. II. Differentiation of the caudal muscle cells in the larva of *Diplosoma macdonaldi* 77

D. Cocchia, G. Tiberio, R. Santarelli, F. Michetti: S-100 protein in "follicular dendritic" cells of rat lymphoid organs. An immunochemical and immunocytochemical study 95

E. Canale, T. Fujiwara, G.R. Campbell: The demonstration of close nerve-Purkinje fibre contacts in false tendons of sheep heart 105

Ch. Haldar-Misra, P. Pévet: The influence of different 5-methoxyindoles on the process of protein/peptide secretion characterized by the formation of granular vesicles in the mouse pineal gland. An in vitro study 113

J. Becerra, G.S. Montes, S.R.R. Bexiga, L.C.U. Junqueira: Structure of the tail fin in teleosts 127

A.S. Mendoza, W. Breipohl: The cell coat of the olfactory epithelium proper and vomeronasal neuroepithelium of the rat as revealed by means of the Ruthenium-red reaction 139

G.B. Stefano, R. Martin: Enkephalin-like immunoreactivity in the pedal ganglion of *Mytilus edulis* (Bivalvia) and its proximity to dopamine-containing structures 147

P. Voisin, M.T. Juillard, J.P. Collin: Indole metabolism in the pineal organ of the pigeon with special reference to melatonin-synthesizing cells. In vitro study combining thin layer chromatography, autoradiography and pharmacological treatment 155

U. Gerbracht, H. Zimmermann: Binding of cationized and native ferritin to cellular structures of the electric organ of *Torpedo marmorata* 171

D.B. Burnham: Epithelial cell production and mucosal morphology in colonic obstruction 185

D.J. Chiego Jr., M.A. Fisher, J.K. Avery, R.M. Klein: Effects of denervation on ^{3}H-fucose incorporation by odontoblasts in the mouse incisor 197

J.A. Brown, S.M. Taylor, Ch.J. Gray: Glomerular ultrastructure of the trout, *Salmo gairdneri*. Glomerular capillary epithelium and the effects of environmental salinity 205

Short Communications

W.B. Winborn, P.J. Sheridan, H.C. McGill: Estrogen receptors in the islets of Langerhans of baboons 219

G.M. Wright: Immunocytochemical study of luteinizing hormone in the pituitary of the sea lamprey, *Petromyzon marinus* L., during its upstream migration 225

P.L.R. Andrews, E.M. Tansey: Aminergic innervation of the blood vessels of *Octopus vulgaris* 229

D.C. Herber., A.Y. Silverman: Topographical distribution of the gonadotrophs, mammotrophs, somatotrophs and thyrotrophs in the pituitary gland of the baboon (*Papio cynocephalus*) 233

No. 2 issued on March 25, 1983

M. Kawata, K. Hashimoto, J. Takahara, Y. Sano: Immunohistochemical identification of neurons containing corticotropin-releasing factor in the rat hypothalamus 239

M. Kawata, K. Hashimoto, J. Takahara, Y. Sano: Differences in the distributional pattern of CRF-, oxytocin-, and vasopressin-immunoreactive nerve fibers in the median eminence of the rat 247

M. Møller, H.-W. Korf: Central innervation of the pineal organ of the Mongolian gerbil. A histochemical and lesion study 259

M. Møller, H.-W. Korf: The origin of central pinealopetal nerve fibers in the Mongolian gerbil as demonstrated by the retrograde transport of horseradish peroxidase 273

I. Vigh-Teichmann, H.-W. Korf, F. Nürnberger, A. Oksche, B. Vigh, R. Olsson: Opsin-immunoreactive outer segments in the pineal and parapineal organs of the lamprey (*Lampetra fluviatilis*), the eel (*Anguilla anguilla*), and the rainbow trout (*Salmo gairdneri*) 289

J. Sievers, U. Mangold, M. Berry: 6-OHDA-induced ectopia of external granule cells in the subarachnoid space covering the cerebellum. Genesis and topography 309

R. Fänge, A. Pulsford: Structural studies on lymphomyeloid tissues of the dogfish, *Scyliorhinus canicula* L. 337

S. Foster, L.J. Goodman, J.G. Duckett: Ultrastructure of sensory receptors on the labium of the rice brown planthopper 353

B.T. Hinton, D.A. Keefer: Evidence for protein absorption from the lumen of the seminiferous tubule and rete of the rat testis 367

C. Anderson: Evidence for 5-HT-containing intrinsic neurons in the teleost intestine 377

A. Fasolo, M.F. Franzoni: The hypothalamus of *Lacerta sicula* R.. II. A Golgi study of the preoptic area 387

D. Nilsson, R. Odselius, R. Elofsson: The compound eye of *Leptodora kindtii* (Cladocera). An adaptation to planktonic life 401

Y. Uchiyama: A histochemical study of variations in the localization of 5′-nucleotidase activity in the acinar cell of the rat exocrine pancreas over the twenty-four hour period 411

J. Rosenberg: Coxal organs of *Lithobius forficatus* (Myriapoda, Chilopoda). Fine-structural investigation with special reference to the transport epithelium 421

K. Unsicker, F. Seidel, H.-D. Hofmann, T.H. Müller, R. Schmidt, A. Wilson: Catecholaminergic innervation of the chicken ovary. With special reference to the follicular wall 431

K. Sugimoto, Y. Ichikawa, I. Nakamura: Endogenous peroxidase activity in brush cell-like cells in the large intestine of the bullfrog tadpole, *Rana catesbeiana* 451

A. Zareba-Kowalska, K. Renkawek, B. Gajkowska: Ultrastructural study of the hypophysial neural lobe of newborn rats in tissue culture 463

No. 3 issued on April 14, 1983

Y.W. Kunz, S. Ennis, C. Wise: Ontogeny of the photoreceptors in the embryonic retina of the viviparous guppy, *Poecilia reticulata* P. (Teleostei). An electron-microscopical study 469

F. Sundler, E. Moghimzadeh, R. Håkanson, M. Ekelund, P. Emson: Nerve fibers in the gut and pancreas of the rat displaying neuropeptide-Y immunoreactivity. Intrinsic and extrinsic origin 487

R. Billard: A quantitative analysis of spermatogenesis in the trout, *Salmo trutta fario* 495

C. Morales, L. Hermo: Demonstration of fluid-phase endocytosis in epithelial cells of the male reproductive system by means of horseradish peroxidase-colloidal gold complex 503

M.E. Stoeckel, S. Schimchowitsch, J.C. Garaud, G. Schmitt, H. Vaudry, A. Porte: Immunocytochemical evidence of intragranular acetylation of α-MSH in the melanotrophic cells of the rabbit 511

R.E. Papka, D.H. Matulionis: Association of substance-P-immunoreactive nerves with the murine olfactory mucosa 517

U. Welsch, S. Singh, B.H. Stemberger, W. Buchheim, S. Patton: Ultrastructural changes in lactating tissue related to the suppression of milk secretion by concanavalin A 527

T.A. Marino, S.R. Houser, F.G. Martin, A.R. Freeman: An ultrastructural morphometric study of the papillary muscle of the right ventricle of the cat 543

A. Meiniel, B. Vivien-Roels: The presence of two populations of sensory-type cells in the pineal organ of the five-bearded rockling, *Ciliata mustela* L. (Teleostei) 553

K. Schildberger: Local interneurons associated with the mushroom bodies and the central body in the brain of *Acheta domesticus* 573

J.F. Leatherland, M.B. Renfree: Structure of the pars distalis in pouch-young tammar wallabies (*Macropus eugenii*) 587

E. Moghimzadeh, A. Nobin, E. Rosengren: Fluorescence microscopical and chemical characterization of the adrenergic innervation in mammalian liver tissue 605

C.A. Squier, G.A. Kammeyer: The role of connective tissue in the maintenance of epithelial differentiation in the adult 615

R.T. Gemmell, S.J. Quirk, G. Jenkin, G.D. Thorburn: Ultrastructural evidence of variation in the number of secretory granules within the granulosa cells of the sheep corpus luteum 631

T. Iijima: Quinacrine-induced degeneration of non-adrenergic, non-cholinergic autonomic nerves in the rat anococcygeus muscle 639

M.V. Ugrumov, I.P. Ivanova, M.S. Mitskevich: Permeability of the blood-brain barrier in the median eminence during the perinatal period in rats 649

S. Čech, M. Sedláčková: Ultrastructure and morphometric analysis of preimplantation mouse embryos 661

C. Klein-Ogus, J.B. Harris: Preliminary observations of satellite cells in undamaged fibres of the rat soleus muscle assaulted by a snake-venom toxin 671

M.D. Grounds, T.A. Partridge: Isoenzyme studies of whole muscle grafts and movement of muscle precursor cells 677

Short Communication

T. Gotow, P.H. Hashimoto: Regional difference in effect of filipin in plasma membranes of epithelial cells and surrounding free cells in the choroid plexus 689
